

**Ambassador Okada's Feature Speech  
at the Association of Professional Engineers of Trinidad and Tobago  
Technical Conference 2016**

On June 23, 2016, His Excellency Mitsuhiro Okada, Ambassador of Japan, made a presentation on “Japan’s Response towards the Creation of a Sustainable and Resilient Society” at the Association of Professional Engineers of Trinidad and Tobago Technical Conference 2016. This Technical Conference has been held to support innovation and action towards the diversification thrust in the Caribbean region.

In his speech, Ambassador Okada referred to Japan’s lessons learned from previous natural disasters, Japan’s cooperation in the areas of disaster risk reduction, energy efficiency and climate change in the Caribbean, as well as Japan’s approach to energy efficiency and the use of renewable energy.

The audience showed their keen interest in Japan’s energy and disaster reduction policies, as various questions were raised on Japan’s measures to promote the use of a home solar power system, as well as queries on Japan’s policy on earthquake retrofitting during the question-and-answer session.
