

2018 JET Send-Off Event

On July 12th, 2018, Ambassador Shinada held the 2018 JET Send-Off Event at his official residence.

Aiming to promote grass-roots internationalisation at the local level, the Japan Exchange and Teaching (JET) Programme invites college graduates from around the world to participate in internationalisation initiatives and be involved in foreign language education at Japan's local government offices, Boards of Education, elementary schools, junior high schools, and senior high schools. The JET Programme has gained high acclaim both domestically and overseas for being one of the world's largest international exchange programmes. We hope that all people involved in the JET Programme, both the participants from abroad and the local people of Japan, will build an international network and become successful in today's global society. This event was to allow our four new JET participants a chance to listen to advice from JET Alumni. Furthermore, the Barbados JET Alumni Association was officially launched at the event.
