The Project for Promotion of Recycling in Antigua

(Grant Assistance for Grass-roots Human Security Projects)

Country Antigua and Barbuda

Field Public Welfare, Waste Management

Grant Amount Up to 77,176 US dollars

Signing of Grant Contract February 10th, 2012

Recipient Antigua and Barbuda Waste Recycling Corporation

Project Site St. John's, Antigua

Outline of the Project

This project aims to improve solid waste management practices in Antigua.

In order to attain this goal, a number of collecting bins, tilt trucks, and conveyor and control panel were provided in order to improve the process of classification of waste.

Upon completion of this project, the environment of the city became cleaner and the quality of life in the community improved through better management of the solid wastes.
