## Priority Area 1: Environment and Disaster Risk Management

### Strategy
The capacity of the Disaster Risk Management Sector to cope with natural disasters will need to be strengthened, such as frequent hurricanes and flooding, along with the dissemination of the outcomes of and lessons learned from past preparation to other countries in the region. In order to cope with Climate Change, both adaptation and mitigation measures will be encouraged. In the Environment sector, waste management (the promotion of the management of waste disposal and recycling), increasing the ratio of renewable energy in the country's energy mix and promoting energy efficiency are required given the country's reliance on imported fuel for energy production.

### Development Issue 1: Improvement in Environment and Disaster Risk Management

#### Program for Improvement in Environment and Disaster Risk Management

**Project**
- Project for the Reconstruction of Bridges in the Cul-de-Sac Basin
  - 全額 (100 Million Yen)
- Japan Overseas Cooperation Volunteers in the Environment Sector
  - Mpl

**Program Summary**
- Strengthening the capacity of the Disaster Risk Management Sector to cope with natural disasters such as frequent hurricanes and flooding will be strengthened along with the dissemination of the outcomes of and lessons learned from past preparation to other countries in the region. In order to cope with Climate Change, both adaptation and mitigation measures will be encouraged. In the Environment sector, waste management (the promotion of the management of waste disposal and recycling), increasing the ratio of renewable energy in the country's energy mix and promoting energy efficiency are required given the country's reliance on imported fuel for energy production.

### Development Issue 2: Sustainable Development of Fisheries

#### Program for Sustainable Development of Fisheries

**Project**
- Project for the Reconstruction of Bridges in the Cul-de-Sac Basin
  - 全額 (100 Million Yen)
- Project for Strengthening the Sustainable Use and Management of Coastal Fisheries Resources in CARICOM Countries
  - Mpl

**Program Summary**
- Support to the development of fisheries in collaboration with the tourism sector. The fisheries industry also plays an important role in supplying protein and providing employment opportunities for Saint Lucians.

## Priority Area 2: Fisheries

### Strategy
The sustainable development of fisheries will be assisted by promoting the effective use of facilities constructed by past Japanese Grant Aid for Fisheries. Sharing expertise and experience of neighbouring island countries with similar problems will be taken into account while extending this assistance.
