

## Rolling Plan for Grenada

As of April 2023

Basic Policy of Assistance	Overcoming Vulnerability
----------------------------	--------------------------

Priority Area 1	Building a Resilient Society														
Development Issue 1  Development of resilient social infrastructure	[Background and Current Situation] As Grenada is a Small Island State, the damage from flooding and landslides caused by hurricanes is severe and affects the development of agriculture and tourism, which are the country's main industries. It is thus important to overcome this vulnerability to natural disasters, including Climate Change. In the area of solid waste management, the Government of Grenada is promoting the 3Rs (Reduce, Reuse and Recycle), however, there also exists concerns of increase in marine plastic waste. Increasing the ratio of renewable energy in the country's energy mix and promoting energy efficiency are also required given the country's reliance on imported fuel for energy production. Furthermore, There are also challenges in responding to the vulnerable healthcare sector that was made apparent by the spread of COVID-19 and other viruses.					【Strategy for addressing development issues】 With cooperation and knowledge sharing with neighbouring countries, Japan will provide the necessary assistance to overcome the specific vulnerabilities of small island developing states, including in the areas of disaster prevention, energy efficiency, renewable energy, solid waste management, healthcare, etc. Additionally, based on the Kunming-Montreal Global Biodiversity Framework (GBF), which was adopted at the end of 2022, Japan will provide support for initiatives that contribute to biodiversity conservation or take biodiversity into account.

					2022 JFY	2023 JFY	2024 JFY	2025 JFY	2026 JFY	2027 JFY					
	Climate change action programme	In the area of disaster management, Japan will provide assistance in strengthening the capacity to respond to natural disasters. To cope with climate change, both adaptation and mitigation measures will be encouraged. In the environmental sector, cooperation with a focus on the conversion to renewable energy and the promotion of energy efficiency, as well as solid waste management will be implemented. Health & sanitation improvement programmes	Japan will contribute to overcoming vulnerability in small island states by providing assistance to help strengthen vulnerable health systems.	Issue-based Training in Health Sector	TR	■	■							3			

Priority Area 2	Sustainable Economic Development												
Development Issue 2 Industrial and human resources development	[Background and Current Situation] The Government of Grenada is emphasising the expansion of tourism and fisheries, which are key sectors of the domestic economy, from the perspective of creating jobs and strengthening food security. Particularly, the fisheries industry, of which the majority is small-scale coastal fishing (Artisanal fisheries), plays an important role in the country's primary industry. Furthermore, sargassum seaweed, which has recently been found drifting in large quantities in Caribbean states, has been affecting the tourism and fisheries industries. In order to address the given concern in addition to other factors, the Government of Grenada is promoting the Blue Economy through sustainable use of marine resources.					【Strategy for addressing development issues】 While utilizing facilities and equipment which were provided by previous Japanese fisheries grant aid, Japan will assist in industrial development and job creation, focusing on the sustainable development of the fisheries industry, taking into account the perspective of sustainable use of marine biological resources. Based on the Kunming-Montreal Global Biodiversity Framework (GBF) adopted at the end of 2022, Japan will contribute to biodiversity conservation or support initiatives that take biodiversity into consideration. During the implementation of projects, country's commitment in promoting the blue economy, as well as knowledge sharing and cooperation with neighbouring island countries facing similar challenges will be considered.							
	Name of Cooperation Programme	Programme Summary	Project	Scheme	Schedule						Assistance Amount (100 Million Yen)	SDGs	Notes
	Agriculture and fisheries development programmes	Japan will contribute to job creation by supporting the promotion of fisheries industries and human resource development. With regard to fisheries, the project will provide support that will lead to community development, focusing on poor fishing villages and small-scale artisanal fishermen, while utilising facilities and equipment which were provided by Japan's previous fisheries grant aid.
