

Priority Area 2	Sustainable Economic Development												
Development Issue 2	【Background and Current Situation】 Despite the commencement of oil production, agriculture remains a major industry in Guyana, contributing significantly in terms of job creation and food security. On the other hand, agriculture is vulnerable to natural disasters such as flooding, thus ensuring the resilience of the agricultural sector remains a major challenge. Furthermore, since rapid economic growth requires highly competent human resources in various sectors, including oil-related sector, there is a need for assistance in human resource development and industrial promotion, which enables to strengthen the capacity of the private sector and promote the creation of jobs.					【Strategy for addressing development issues】 Japan aim to strengthen food security and economic infrastructure through human resource development, mainly through issue-based training.
