

Rolling Plan for the Cooperative Republic of Guyana

As of April 2018

Basic Policy of Assistance	Overcoming Vulnerability (common to all CARICOM member countries)
----------------------------	--

Priority Area 1	Disaster Risk Management and the Environment
-----------------	---

	<p>[Background and current situation] Although Guyana is a continental country, it is a coastal lowland country and is on the list of SIDS (Small Island Developing States) published by the UN Secretariat along with the other CARICOM member states. Taking Climate Change into account, disaster risk reduction measures have become an urgent need in Guyana due to the fact that the majority of the population lives in the coastal lowlands. In addition, increasing the ratio of renewable energy in the country's energy mix and promoting energy efficiency are required to address energy issues such as loss in power distribution and high electricity rates. Urban environmental management, such as solid waste management, including the promotion of 3Rs (Reduce, Reuse and Recycle), is also required from the viewpoint of promoting urban sanitary environmental conservation. Furthermore, in the field of water resources, improvement in the rate of water treatment and sewerage coverage, and the reduction of non-revenue water are major challenges.</p>	<p>[Strategy] In the Disaster Risk Management sector, the Project for Strengthening Women's Disaster Management Capacities in Guyana and Dominica will be carried out to build the capacity for Disaster Management. To cope with Climate Change, both adaptation and mitigation measures will be encouraged through the ongoing program "Japan-Caribbean Climate Change Partnership." In the Environment sector, encouraging activity in the private sector, focusing on increasing the ratio of renewable energy in the country's energy mix, promoting energy efficiency, solid waste management, water resource management, etc., as well as the provision of assistance to enhance the public sector, as it relates to overcoming vulnerabilities particular to Small Island Developing States, will be considered and offered. Sharing expertise and experience and promoting synergy among neighbouring countries with similar problems will be taken into account while extending the development assistance.</p>

Development Issue 1	Japan's Assistance Program	Program Summary	Project	Scheme	Schedule						Assistance Amount (100 Million Yen)	Note			
					Before 2017	JFY 2018	JFY 2019	JFY 2020	JFY 2021	JFY 2022					
Improvement in Disaster Risk Management and the Environment	Program on Support for Improvement in Disaster Risk Management and the Environment	In the field of disaster prevention, we will strengthen our ability to cope with natural disasters. About measures against climate change, we will promote measures in both adaptation (disaster prevention) and mitigation through grant aid under implementation. In the environmental field, the necessary support for overcoming small island developing country specific vulnerabilities, focusing on waste management (promotion of 3Rs and improvement of operation and management of waste disposal sites), conversion to renewable energy and promotion of energy saving carry out.	Grant Aid in the sector of Disaster Risk Management	GA	█							3.00			
			Project for Strengthening Women's Disaster Management Capacities in Guyana and Dominica	GA	█	█	█	█					5.60	Collaborating with UNDP for 2 countries	
			Issue-based Training and Training Program for Young Leaders in the sector of Disaster Risk Management	TR	█	█	█								
			Japan-Caribbean Climate Change Partnership (JCCCP)	GA	█	█	█						15.26 (Total for 8 countries)	Collaborating with UNDP for 8 countries.	
			Project for the Introduction of Renewable Energy and Energy Efficient Power system	GA		█	█	█					18.48		

Priority Area 2	Other
